

Hearthwarmer-II

Woodburning Fireplace Insert

Hearthwarmer-II shown with optional "Legend" Fireplace Glass Doors by Design Specialties.

Transforming your inefficient masonry or zero-clearance fireplace into an elegant heat source from the inside out.

www.bigwoodshearth.com

Features:

- Eco-friendly! Burns renewable fuel
- Up to 40,000 BTU's/hr of warmth
- Heat output of 400+ degrees
- 100 CFM UL Listed variable blower with rheostat
- Replaceable bar grate
- Maintain the beauty of your fireplace without compromising the viewing area
- Teddy Mold™ thermally protective cover for blower
- Decorative andirons standard
- Designed for EASY installation
- 37" front grille standard
- 3-Year Limited Warranty
- Hand-crafted in the USA

Proprietary Technology Teddy Mold™

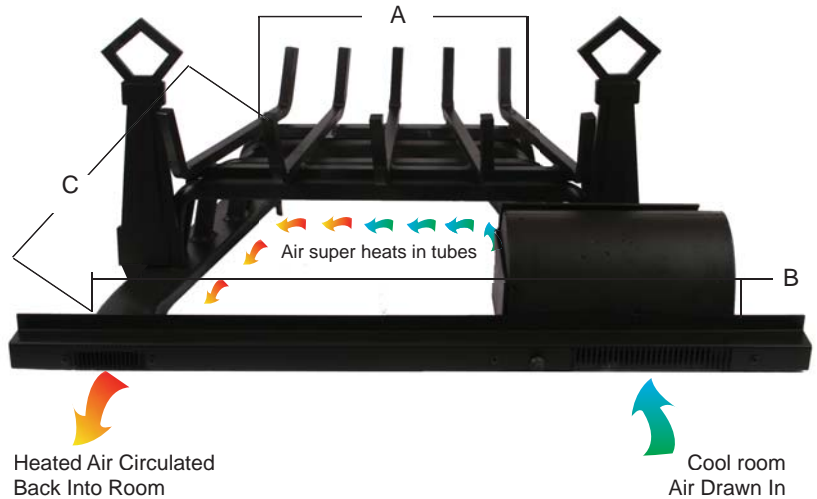

The Teddy Mold™, made from a recycled concrete material, protects the fan from the high heat of the fire. The HW-II is the **ONLY** heat-exchanger on the market that has a thermally protected cover and greatly extends the life and performance of the blower.

Hearthwarmer - II

HW-II Woodburning Fireplace Insert

The Hearthwarmer - II Woodburning Insert simply replaces the grate in your existing masonry or zero-clearance fireplace. The attached blower draws in cool room air, circulates it through the hollow tubing of the heat exchanger where it heats up, and is blown back out into your room, increasing the efficiency of your fireplace.

Hearthwarmer - II	A	B	C
	Back Width	Front Width	Depth
Actual HW-II Dimensions	19"	31-1/2"	21"
Minimum Firebox Dimensions	19-1/2"	32"	21-1/2"

Fireplace Glass Doors

It is recommended to always use fireplace glass doors to help prevent heat loss when the fireplace is not in use. The Hearthwarmer-II works with **MOST** masonry glass doors. You must be able to adjust existing glass doors upward 1-3/8" to accommodate the front grille of the Hearthwarmer. The doors will then sit directly on the front grille.

For custom glass fireplace doors specifically designed to work seamlessly with the HW-II (as shown on front cover), visit Design Specialties website at www.glassfireplacedoors.com.
